# DISPLAY STANDS

**Display Stands** consist of a strong, lightweight, aluminium frame and a stretchy printed fabric cover.

The aluminium frame features a simple 'click together' mechanism and each part is numbered for quick, straight forward assembly. The cover can be printed on the front and reverse, and fits snugly over the frame. It is washable, and extra covers can be ordered separately.

These display stands give a superior presence at exhibitions and are ideal for permanent indoor office or studio props.

Display Stand frames utilise a simple 'click together' mechanism.

Each part is numbered for easy identification and quick assembly.

All **Display Stands** are supplied with a carry bag for easy transportation and storage.

# BACKDROPS

**Backdrops** are made up of the same components as display stands but offer a much larger display area.

They are perfect for defining an exhibition area, or to section off a large room. They use one continuous graphic which means they completely eliminate the problem of visible join lines commonly encountered on the traditional multi-panel exhibition backdrops.

Both the front and the reverse of the backdrops can be printed, giving more room for a promotional message and increasing their functionality.

All backdrops are supplied with a carry bag for easy transportation and storage.

This gazebo has a fully printed canopy plus one half height wall and one full height wall – £1,046.

# GAZEBOS

**Gazebos** are a versatile product. They provide abundant promotional space as well as shelter at outdoor events.

**Printed gazebos are all the rage at farmer's markets, festivals and fairs. Our range now features new lower cost options, so you can make the most of your marketing budget.**

In every case, the gazebo frame is the same. It's compact for storage, then pops up and locks into place.

You've got a choice of a plain black canopy, your name or logo printed on the front fascia or your branding fully printed on all sides and the top too. Each canopy is a water resistant

material that'll keep you and your stock dry if it rains.

Clip on the number of sides you want. A full height wall hangs from the top, or you can choose half height walls, which come with a rail. Why not print a half height wall for the front too, to act as a cool branded counter?

Remember you can buy all the printed parts separately, so you can change your messages for each season or each event, and keep using the same frame.

Frame contracts to compact size.

Pull the legs outwards – the frame builds itself.

Pop the canopy on top.

Arrange the corners of the canopy.

# DESIGN YOUR GAZEBO

## STEP 1

## CHOOSE YOUR SIZE

Our bestseller is 3m x 3m, bigger than typical domestic gazebos. Our most impressive is the double-width 6m edition and for those that like something in-between, the 4.5m edition.

This gazebo has a fascia printed canopy plus one half height wall and one full height wall – £689

- 3 x 3 m Gazebo – frame & canopy
- Printed on waterproof 285gsm Tent Fabric
- Assembled size(mm): 3000(w) x 3000(h) x 3000(d)
- Walls full colour print on one side or both sides
- Fire retardant and fade resistant
- Supplied with heavy duty steel frame, carry bag, ground pegs and guide rope

STEP 2

## CHOOSE YOUR CANOPY

Our lowest price is a black unprinted canopy. Upgrade and get the fascia pelmet printed. Or, be bold and opt for the whole top and pelmet printed on all sides.

## THEN ADD YOUR WALLS

Most people finish their gazebo with walls. The most popular combo is one full height back wall and two half height sides. Half height walls include a hanging rail – put on the front to hide a table if you're selling stuff over the counter.

# CHOOSE YOUR FLAG MATERIAL

## SINGLE SIDED

The lowest cost option. Your design will be printed one side. If viewed from behind, you'll see a mirror image on the reverse.

## DOUBLE SIDED

Have a different message on each side of the flag, or show the same message on both sides – we put a blackout divider in between to prevent showthrough.

## VENT WEAVE

For more exposed environments, opt for a single-sided vent material which allows maximum air to pass through.
